

Garage Door Roller Shutter

Contact us for more information

Product Specification / Features

Product Code:	N/A
Max Width	5m
Max Height	5m
Weight per sqm	7.5
Lath Height/Profile	36, 55, 77mm
Single/Twin Skin?	Twin
Material	Aluminium
Guide Depth	25,45,53,60,65
Plate Size	150-300mm
Colours Available	Full RAL
Punch/Perf Available?	Yes

Additional Information

What Are Garage Door Roller Shutters? Unique Designs for you. Expert Installation. Ongoing Support.

Roller Shutter Garage Doors are exactly what they sound like - roller shutters that have been used as a garage door. They are usually made from aluminium profiles and can be powder coated or have laminate finishes applied to them to give them a wooden appearance.

Roller Shutters make excellent options for garage doors. Their roll-up mechanism saves a lot of ceiling space and offers a simpler, higher security option than the traditional up and over garage doors which are more likely to break or come loose from their cables.

There are options for remote control fobs, safety edge sensors, and photo cell beams. It is also possible to upgrade garage door roller shutters to an SRI or SR2 security rating, so you can make sure your garage (and its contents) are as safe as they possibly can be.

What Are Garage Door Roller Shutters used For?

As the name says on the tin, Roller Shutter Garage Doors are found exclusively on homes where there are single or double garages. They are also useful for any other kind of outbuilding, and if you think there's something you would like to use a shutter on at home, there's a good chance we can help. Common places to find shutters at home include:

- Garages
- Patio Doors
- Windows
- Outbuildings
- Stables
- Sheds

If you have a requirement that you don't see listed above, that doesn't mean we can't help. Get in touch with our friendly sales team to discuss your requirements.
